

"Wood has been from time immemorial a part of human life."

-Helmut Rostan

Stina Gunnarsson

Owner and founder of Just Wood

The Story

I have been working with wood all my life.

I have a master of science in Mechanical engineering and wood technology, and I have been working within the Swedish furniture industry for many years. Today I teach wood technology at Linköping University and run my company JUST WOOD since 2014.

Just Wood is all about wood. Wooden jewelry and wooden products for your home and kitchen. Unique, exclusive, made IN Sweden. Also, I take the chance to educate you a little about wood. Why it is a fantastic material, why we should use more wood etc.

Head Office

Just Wood has recently moved to new premises in the old part of Linköping between existing "Storgatan" and the old "Storgatan". Close to the beautiful chatedral and all activities in "hemslöjds-gården" with workshops, conference, design studios etc.

Showroom

Come and have a closer look at Just Wood's jewelry or Just Wood's laser cutter, or come and talk to Stina about wood. Or why not bring some friends for a Wood-party with fun wood information, bubbles and wood nuts.

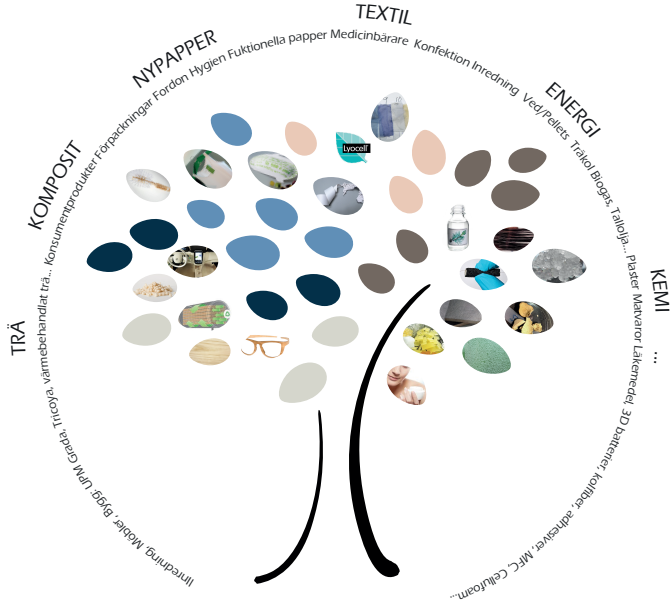

About Wood

There are several good reasons for choosing wood. Wood is beautiful, light and durable for making things, and warm and comfortable to live around. AND it actually stores CO₂ from our cars, industries etc.

The fact that Sweden is a forested country provides us with a great opportunity to be part of the solution in relation to important climate and environment issues.

When using different wood materials and products made of wood, like wooden jewelry, you play an important role in preventing climate changes as well!

LASER Collection

A modern technique meets a classic material. The products of the LASER collection are all made by laser technique which leaves a dark brown edge, a beautiful contrast to the light colored wood. You recognize the shapes from the JustWood logotype. A new laser is bought, a web-tool is under construction so more will happen in the future. Stay tuned!

Materials: Oak wood, with three layers of veneer. Metal parts antique bronze. All metals are nickel free.

The LASER necklace, 5 L.

KUL Collection

Colors makes life fun!
The products in the KUL collection are made of turned, colored wooden beads in different sizes and shapes. All with a wooden JustWood-tag attached. Match with your every day clothing. Combine as you want, and have fun!

Materials: Beech and birch colored beads.
Bracelets with elastic string.
Necklaces with metal wire.
Metal parts in silver color.
All nickel free.

BASIC Collection

Back to basics. The products of the BASIC collection are plain, simple and natural, yet powerful, stylish and full of awareness.

No varnish is used, the wood is as natural as it can be, and it will change color through time and get a used patina.

Wear it and feel the power of wood!

Materials: Natural solid beech and birch wood.
Waxed cotton string.
Metal parts silver and antique bronze color.
Nickel free.
